

Technology In Society

Vol. 26, No.2/3

Table of Contents

Technology and Science Entering the 21st Century

Introduction

Rodney Nichols *Honor the goddess and the cow: an appreciation of the anniversary issue*

1. Domestic Missions

Paul E. Waggoner *Agricultural technology and its societal implications*
Kenneth I. Shine *Technology and health*
James Rutherford *Technology in the schools*
Henry Petroski *Technology and architecture in an age of terrorism*
Charles G. Groat *Seismographs, sensors, and satellites: better technology for safer communities*
Hans Mark *NASA at the crossroad*
Leonard Kleinrock *The Internet rules of engagement: then and now*
Kurt E. Yeager *Electricity for the 21st century: digital electricity for a digital economy*
Robert W. Lucky *Yesterday's dreams and today's reality in telecommunications*

2. International Affairs and Security

William Perry *Military technology – an historical perspective*
Albert D. Wheelon *Technology and intelligence*
Ashton Carter *Overhauling Counterproliferation*
Lewis Branscomb *Protecting civil society from terrorism: the search for a sustainable strategy*
Victoria Sutton *Law and science drive technology in the war against bioterrorism*
Norman Neureiter *Science and technology at the Department of State*
Walter Wriston *Freedom and democracy in the information age*

3. Social Impacts and Expectations

John A. Alic	<i>Technology and labor in the new U.S. economy</i>
Jesse H. Ausubel	<i>Will the rest of the world live like America?</i>
Daniel S. Goldin	<i>Bold mission and the big picture: the societal impact of America's space program</i>
George M. C. Fisher	<i>Leading in an increasingly complex society</i>
Robert M. White & William Hooke	<i>Climate science, technology and politics: a tangled web</i>
William A. Wulf	<i>Engineering ethics and society</i>

4. Cross-Disciplinary Research Frontiers

Guy McKhann	<i>The New World of Neuroscience - The Perspective of a Clinical Neuroscientist</i>
Joseph G. Perpich	<i>The dawn of genomic and regenerative medicine: new paradigms for medicine, the public's health, and society</i>
Paul Citron & Robert M. Nerem	<i>Bioengineering: 25 years of progress – but still a beginning</i>
E.M. Harper & T.E. Graedel	<i>Industrial ecology: a teenager's progress</i>
Alvin M. Weinberg	<i>On "immortal" nuclear power plants</i>

5. Policies and Priorities for Science and Technology

D. Allan Bromley	<i>Technology policy</i>
Bhaskar Chakravorti	<i>The role of adoption networks in the success of innovations: a strategic perspective</i>
Jonathan Wiener	<i>The regulation of technology and the technology of regulation</i>
Richard Wilson	<i>Ensuring sound science in the courts</i>
John De La Mothe	<i>The institutional governance of technology, society and innovation</i>
