nytimes.com/timestalks  
or call (888) NYT-1870  
General Admission: **\$25\***

## Global Warming and Our Future

**Melting polar ice, rising sea levels and eroding coastlines are unavoidable to some extent because of greenhouse gases already deposited in the atmosphere. Many scientists say existing policies are grossly inadequate. How can we avoid the worst outcomes? Join a panel of experts in a discussion about this controversial scientific and political issue. With Times science reporter Andrew Revkin.**

Jesse Ausubel,  
director, program  
for the human  
environment, The  
Rockefeller University

James Hansen,  
chief of the NASA  
Goddard Institute for  
Space Studies in  
New York
